Now work ok.

Another problem,

I have radicare in 3 system:

1. IIS, path radicare E:\intranet\radicare\...
work ok
2. xp + wamp
work ok
3. IIS, path radicare C:\inetpub\wwwroot\Intranet\radicare\...
error before logon screen

My solution:

```
..../includes/config.inc
```

```
$_SERVER['DOCUMENT_ROOT']="C:\inetpub\wwwroot";
```

The reason:

In IIS, \$_SERVER['DOCUMENT_ROOT'] is empty.

Very grateful for your quick response.
