Here it is:

Page Stack:

```
[0] main_menu  
[1] ceae  
[2] ceae_entidad_importes(list1)
```

```
0: array =  
  file: string = /Applications/MAMP/htdocs/radicore/includes/include.xml.php5.inc  
  line: integer = 89  
  function: string = createElement  
  class: string = DOMDocument  
  type: string = ->  
  args: array =  
    0: string = sum(importe)  
1: array =  
  file: string = /Applications/MAMP/htdocs/radicore/includes/include.xml.php5.inc  
  line: integer = 643  
  function: string = addData2XMLdoc  
  args: array =  
    4: array =  
2: array =  
  file: string = /Applications/MAMP/htdocs/radicore/includes/std.list1.inc  
  line: integer = 193  
  function: string = buildXML  
  args: array =  
    0: array =  
      0: array =  
      1: array =  
      2: array =  
3: array =  
  file: string = /Applications/MAMP/htdocs/radicore/ceae/entidad_importes(list1).php  
  line: integer = 19  
  args: array =  
    0: string = /Applications/MAMP/htdocs/radicore/includes/std.list1.inc  
  function: string = require
```

Can the cause be something that I've put in the php file:?

```
<?php
```

```
// *****  
// List the contents of a database table and allow the user to view/modify  
// the contents by activating other screens via navigation buttons.  
// *****  
  
$table_id = 'entidad_s01';           // table name  
$screen   = 'entidad_importes.list1.screen.inc'; // file identifying screen structure  
  
// customise the SQL SELECT statement  
$sql_select = 'noment,sum(importe)';  
$sql_from   = null;  
$sql_where  = null;  
$sql_groupby = '1';  
$sql_having = null;  
$sql_orderby = '1';  
$sql_search_table = null;  
  
require 'std.list1.inc';           // activate page controller  
  
?>
```
