Here's the fix:

In file 'include.session.inc' at line 1028 change

```
if (isset($_SESSION['page_stack'])) {
    // remove any redundant entries in $_SESSION['page_stack']
    $_SESSION['page_stack'] = comparePageStacks($_SESSION['page_stack'], $page_stack);
} // ifto
if (isset($_SESSION['page_stack'])) {
    if (basename($PHP_SELF) == 'help.php') {
        // continue
    } else {
        // remove any redundant entries in $_SESSION['page_stack']
        $_SESSION['page_stack'] = comparePageStacks($_SESSION['page_stack'],
$page_stack);
    } // if
} // if
```
