Subject: Re: xsl transformation slow Posted by AJM on Wed, 20 Sep 2006 22:19:20 GMT View Forum Message <> Reply to Message

The more records you ask it to process the longer it takes, so the use of such large record sets should be avoided. Is there a good reason why you feel the need to display 100 records at a time?

Unfortunately the speed of XSL transformations with PHP 4 is quite slow compared with PHP 5, so I can only offer the following advice:

- (a) Avoid such large record sets.
- (b) Upgrade to PHP 5
- (c) Upgrade your hardware.
