Subject: How to change the screen title of a list1 task Posted by jjtoranzo2004 on Tue, 25 Sep 2012 13:06:46 GMT

The documentation (http://www.tonymarston.net/php-mysql/radicore-tutorial.html) says:

"Screen titles originate in the task description field in the MNU_TASK table."

I want to change the title of a list1 screen, that is, the title that exists between the Menu Bar and the Navigation Bar.

At present it is displaying the task id and not the task title.

I changed the task title using the following screen: Home»Menu System»Task (Proc) but nothing happened.

Although I changed the descritpion of the task I created, when I use it, the title displayed is the task id, in fact, the automatically generated task id (that is the identifier without any spaces) and not the task description.

http://www.tonymarston.net/php-mysql/radicore-tutorial.html

How can I make it display the task description?

Thanks in advance.
