Here are just a few examples:

Example 1
    $where = "test_id < 3 ";(With tabs between 'test_id' and '<')

Example 2
    $where = "test_id <
      3 ";
Example 3
    $where = " test_id < 3";(With tabs before 'test_id')

Example 4
    $where = "
      test_id < 3";
Example 5
    $where = "test_id < 3";
Examples 1 and 2 both result in
    Fatal Error: Cannot extract token from: '< 3' (# 256)
    Error in line 6994 of file 'D:\Pet\UwAmp\www\rad186\includes\include.library.inc'.

Example 3 and 4 both result in
    Fatal Error: Cannot extract token from: ' test_id < 3' (# 256)
    Error in line 6994 of file 'D:\Pet\UwAmp\www\rad186\includes\include.library.inc'.

Example 5 functions normally without errors.
