Subject: Invoice - Automatic Tax and Net value calculation while entering data Posted by douglas on Wed, 28 Mar 2007 05:00:53 GMT View Forum Message <> Reply to Message

Sir,

I have many fields in the data entry form that the user has to be fed. While entring these fields, some others such as tax (5% of the amount column), welfare fund (2% of the amount column) netAmount (Amount+Tax+welfareFund) etc have to be displayed in the corresponding textboxes provided automatically. How can it be possible. Can you give me some examples? Yours sincerely Douglas D'Silva.
