Hi all !

I have a problem during authentication.

I type the identifier: MGR

the password: and I understand correctly that I have to type in password!

And I get a very dry message: "Security Violation"

same attempt with demo / demo same result!

I downloaded the latest version (2.16.0) of the Radicore framework.

I installed it on a Windows 7 Pro SP1 machine

I use on this same machine: WAMP 32 bits 3.17

my .htaccess looks like this:

```
-----8<-----8<-----8<-----8<-----8 <-----8<-----8<-----8<-----8<-----8<  
<Files ~ "\.inc\$">
```

```
Order Deny,Allow  
Deny from all  
</Files>
```

```
php_value include_path ".:D:\wamp32\317\www\radicore\includes:D:\wamp32\317\www\radicore\menu:"
```

```
php_value default_charset "UTF-8"  
php_value mbstring.internal_encoding "UTF-8"
```

```
php_value register_globals 0  
php_value magic_quotes_gpc 0  
php_value magic_quotes_runtime 0  
php_value magic_quotes_sybase 0
```

```
# php_value session.use_cookies 1  
# php_value session.use_only_cookies 0  
# php_value session.use_trans_sid 1
```

```
php_value session.use_cookies 1  
php_value session.use_only_cookies 1  
php_value session.use_trans_sid 0
```

```
php_value session.gc_maxlifetime 14400
```

```
php_value session.cookie_httponly 1  
php_value arg_separator.output "&"  
php_value url_rewriter.tags "a=href,area=href,frame=src,input=src,fieldset="  
php_value always_populate_raw_post_data -1
```

-----8<-----8<-----8<-----8<-----8<-----8 <-----8<-----8<-----8<-----8<

file : config.inc looks like this (extracts)

-----8<-----8<-----8<-----8<-----8<-----8 <-----8<-----8<-----8<-----8<

1

```
// set this to TRUE to write all sql queries to file 'sql/<script_id>.sql' (for debugging)  
$GLOBALS['log_sql_query'] = true;
```

```
// defines directory into which error logs will be written
```

```
//define('ERROR_LOG_DIR', $_SERVER['DOCUMENT_ROOT'].'/error_logs');
```

3

```
// causes the logstuff() function to write details to the log file
define('LOGSTUFF', true);
```

-----8<-----8<-----8<-----8<-----8<-----8 <-----8<-----8<-----8<-----8<

I guess: "There is something rotten in the state of my setup"

What else can I check to resolve this issue? Ideas ?
