---

radicore-2017-09-01 new installation.

OS: Windows 10  
Browser: Tested in Firefox and Chrome.  
Lenguaje: Spanish  
Using WAMP SERVER  
MySQL: version 5.5.24  
PHP: version 5.4.3

-----  
( ! ) SCREAM: Error suppression ignored for  
( ! ) Fatal error: File C:\wamp\www\radicore\menu\text\en/sys.language\_text.inc is empty in  
C:\radicore\includes\include.library.inc on line 3651  
-----

#### Call Stack

# Time Memory Function Location

```
1 0.0014 300168 {main}() ..\logon.php:0
2 1.1369 7141128 mnu_user->__construct() ..\logon.php:164
3 1.1369 7141304 Default_Table->getFieldSpec_original() ..\mnu_user.class.inc:28
4 1.1376 7205424 RDCsingleton::getInstance() ..\std.table.class.inc:2851
5 1.1393 7406032 date_class->__construct() ..\std.singleton.php5.inc:127
6 1.1393 7406208 getLanguageArray() ..\std.datevalidation.class.inc:25
7 1.1409 7359224 trigger_error() ..\include.library.inc:3394
8 1.1409 7362304 errorHandler() ..\include.library.inc:3394
9 1.1445 7494728 getLanguageText() ..\error.inc:176
10 1.1455 7416152 trigger_error() ..\include.library.inc:3651
```

I been looking back to the stack and source, and seems to have a problem with the language.  
Hope you can help! Thanks.

Have you checked that the file is not empty? Can you replace it with the one in the downloaded zip file?

Hi,  
I been looking that you suggested, but everything was ok. All the files in place.  
I changed my computer lenguaje to english, and now I think where is the error, looking back to the  
program calls.

C:\wamp\www\radicore\includes\include.library.inc on line 3651

#### Call Stack

| # | Time   | Memory  | Function                     | Location                    |
|---|--------|---------|------------------------------|-----------------------------|
| 1 | 0.0108 | 297272  | {main}()                     | ..\logon.php:0              |
| 2 | 1.9224 | 7200504 | radicore_view->__construct() | ..\logon.php:212            |
| 3 | 1.9258 | 7318944 | trigger_error()              | ..\include.xml.php5.inc:37  |
| 4 | 1.9258 | 7319776 | errorHandler()               | ..\include.xml.php5.inc:37  |
| 5 | 1.9258 | 7326560 | getLanguageText()            | ..\error.inc:166            |
| 6 | 1.9267 | 7247992 | trigger_error()              | ..\include.library.inc:3651 |

Found that probably the problem is with XSL functions. In the include.xml.php5.inc  
--> trigger\_error(getLanguageText('sys0070', 'XSL'), E\_USER\_ERROR);  
Looking at installation instructions, in point  
4. You will need to change permissions so that the following directories have write access:

- RADICORE - for the errorlog.html file.
- CLASSES - for all <table>.class.inc and <table>.dict.inc files.
- ERROR\_LOGS - for errorlog.html file.
- LOGS - for all output from background tasks.
- SQL - for all <subsystem>.dict\_export.sql and <subsystem>.menu\_export.sql files.
- TEXT - for all <subsystem>.menu\_export.txt files.
- XSL - for all <script\_id>.xml files.

Probably that is my problem!  
But in my actual windows 10 enviroment and don't know how to do this.  
Do I have to change in the httpd.conf?

Thank you for your support!

If you changed your computer language to English, what was it before?

You should not have to change the permissions on those directories if you are running on MS Windows.

I have tried setting my PC's language to Spanish, and my browser language to Spanish, but I cannot reproduce this fault. Radicore can only support other languages when they have supporting files in the text directory. Your error message clearly shows that it was looking for the sys.language\_text.inc file in the 'menu/text/en' directory, and as that file exists that error should not appear.

You may need to add English as an optional language in your browser.

I think I have found the cause of this error. See the attached zip file for a new version of include.library.inc
