
Subject: Filepicker - choose Null button

I have a problem with a filepicker task when I want to delete the actual entry by pressing the choose Null button. I tried it in your demonstration system and I get the same result. In Xample prototype in update person you can change the person picture but you can't clear it. In the organization field the choose Null button works fine.

Whoops! :blush: I wonder how that happened?

The fixed script is in the attached zip file.

Thank you. But now the following error message appears and I can't log in to the application. See attached jpg file.

Attached is an updated version of include.xml.php5.inc. This should fix the problem.
