Subject: Maximum Query Execution Time Posted by gpatti on Wed, 30 Sep 2009 13:20:13 GMT View Forum Message <> Reply to Message

Is there any way within Radicore to set the maximum query execution time for the session, or for an individual query, or does this need to be done at server/daabase level?

Do you mean sql query time, or HTTP response time?

Take a look at max\_execution\_time and max\_input\_time.

If the value can be set, then either set it in your php.in file or use ini\_set().
