---

When I start upgrade my instalation on 1.33, I found in  
/radicore/menu/sql/mysql/alter\_table(2008-01-03).sql  
sql instruction :

```
ALTER TABLE 'mnu_role_taskfield' DROP INDEX task_id_2;  
Parser could not execute this ALTER TABLE because couldn't find task_id_2!
```

In /radicore/menu/sql/mysql/menu-shema.sql I found  
CREATE TABLE .....  
KEY 'task\_id' ('task\_id')

Is it necessary to drop index ('task\_id') ????
