I must be doing something wrong because in post_insertRecord I get a NULL value for \$fieldarray['participante_id'];
Any idea why?

```
function _cm_validateInsert($rowdata){

    $part = new participante;
    $existe_participante = $part->getCount("catsalut='".$rowdata['catsalut']."'");

    if ($existe_participante > 0){

        $this->messages['participante_existe'] = "Participante ya dado de alta en el sistema, no se han
modificado datos existentes";
        return null;
    }
    return $rowdata;
}

function _cm_post_insertRecord($fieldarray)

{
    require_once 'classes/entidad.class.inc';
    $entidad = new entidad;
    $entidad->sql_select = 'entidad_id';
    $entidad_id = $entidad->getData("nombre=" . $_SESSION['role_id'] . "");

    require_once 'classes/part_ent_xref.class.inc';
    $part_ent_xref = new part_ent_xref;
    $insert_array['participante_id'] = $fieldarray['participante_id'];
    $insert_array['entidad_id'] = $entidad_id[0]['entidad_id'];

    $insert_array = $part_ent_xref->insertOrUpdate($insert_array);

    if ($part_ent_xref->errors){
        $this->errors = $part_ent_xref->errors;
        return $fieldarray;
    }
    return $fieldarray;
}
```
