Subject: Backslash adding in CONCAT in calculated field

I defined this calculated field in a relationship:

CONCAT_WS(',',participante.catsalut, participante.nombre,
participante.apellido1,participante.apellido2) AS part_det

when I saved it it was automatically transformed to:
CONCAT_WS(\',\',participante.catsalut, participante.nombre,
participante.apellido1,participante.apellido2) AS part_det

So when running the application I got this error:
Fatal Error: MySQL error: 1064 - You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near '\',\',participante.catsalut, participante.nombre, participante.apellido1,partici' at line 1 (# 1064).

SQL query: SELECT SQL_CALC_FOUND_ROWS equipo.equipo_id, participante.participante_id,
CONCAT_WS(\',\',participante.catsalut, participante.nombre,
participante.apellido1,participante.apellido2) AS part_det,
