Hi Tony,

I try to put new column in teee\_node table node\_desc\_long, and to put in tree\_structure.list.screen.inc, but it is not working. I investigate and find that in \_cm\_GetNode you put select with join, where I found node\_desc ...Which changes and where is necessary, I have to make, for this purpose (to have new column node\_desc\_long instead of node\_desc) in List structure screen.

Thanks in advance
