I got this message:
This application has encountered an unrecoverable error
The following has been reported to the administrator:

2006-04-19 22:06:15
Fatal Error: MySQL error: 1044 : Access denied for user: 'augustin@localhost' to database '****audit' (# 256).

Error in line 47 of file '/home/httpd/vhosts/augustin.it/httpdocs/radicore/includes/dml.mysql.class.inc'.

Script: /radicore/menu/logon.php

Remote Address: 84.87.84.59

Request URI: /radicore/menu/logon.php

Warning: error_log(../errorlog.html): failed to open stream: Permission denied in /home/httpd/vhosts/augustin.it/httpdocs/radicore/includes/er ror.inc on line 156

I have configure a mysql database with the name augustin.

I have entered the login name and password at the config.inc

```
} else {
    // this is for my shared web host
    $GLOBALS['dbusername'] = 'xxxxxx';
    $GLOBALS['dbuserpass'] = 'xxxxxx';
```

it looks like your program finds a database called '****audit'

where can i config the database name?

Many thanks again

Erik
