Here it is:

Page Stack:

[0] main_menu
[1] ceae
[2] ceae_entidad_importes(list1)

0: array =
file: string = /Applications/MAMP/htdocs/radicore/includes/include.xml.php5.inc
line: integer = 89
function: string = createElement
class: string = DOMDocument
type: string = ->
args: array =
0: string = sum(importe)
1: array =
file: string = /Applications/MAMP/htdocs/radicore/includes/include.xml.php5.inc
line: integer = 643
function: string = addData2XMLdoc
args: array =
4: array =
2: array =
file: string = /Applications/MAMP/htdocs/radicore/includes/std.list1.inc
line: integer = 193
function: string = buildXML
args: array =
0: array =
0: array =
1: array =
2: array =
3: array =
file: string = /Applications/MAMP/htdocs/radicore/ceae/entidad_importes(list1).php
line: integer = 19
args: array =
0: string = /Applications/MAMP/htdocs/radicore/includes/std.list1.inc
function: string = require

Can the cause be something that I've put in the php file:?

<?php

```
// ******************************************************************************
// List the contents of a database table and allow the user to view/modify
// the contents by activating other screens via navigation buttons.
// ******************************************************************************

$table_id = 'entidad_s01';                    // table name
$screen   = 'entidad_importes.list1.screen.inc';     // file identifying screen structure

// customise the SQL SELECT statement
$sql_select  = 'noment,sum(importe)';
$sql_from    = null;
$sql_where   = null;
$sql_groupby = '1';
$sql_having  = null;
$sql_orderby = '1';
$sql_search_table = null;

require 'std.list1.inc';           // activate page controller

?>
```
