The output2 task ends with the following code:

```
if (!eregi('(D|I)', $destination) OR !empty($errors)) {
    scriptPrevious($errors, $messages);
} else {
    unset($_SESSION['pages'][getSelf()]);  // delete current script from session array
} // if
```

which means that the scriptPrevious() function is only executed when the value of $destination is not 'D' or 'I'. What value do you have?
