This are the two sql statements (I removed the from part to make it comprehensible):

Outer:
SELECT SQL_CALC_FOUND_ROWS entidad_id, MAX(noment) as noment, sum(importe) as importe FROM ... as entidad_s01 WHERE (entidad_id='5') OR (entidad_id='6') GROUP BY 1 LIMIT 1 OFFSET 0 =>Count=2

Inner:
SELECT SQL_CALC_FOUND_ROWS entidad_id, concepto, sum(importe) as importe FROM .. as entidad_s02 WHERE entidad_id='5' GROUP BY 1,2 LIMIT 10 OFFSET 0 =>Count=1
