Run this SQL statement and it will insert entries into MNU\_ROLE\_TASK for all available roles:

```
INSERT INTO mnu_role_task (role_id, task_id)
```

```
    SELECT mnu_role.role_id, 'mnu_motd(show)'
```

```
        FROM mnu_role
```

```
    WHERE NOT EXISTS (SELECT 1 FROM mnu_role_task AS mrt
```

```
        WHERE mrt.role_id=mnu_role.role_id AND mrt.task_id='mnu_motd(show)');
```

I shall include this in the update script.
