Here's the fix:

In file 'include.session.inc' at line 1028 change

```
if (isset($_SESSION['page_stack'])) {  
    // remove any redundant entries in $_SESSION['page_stack']  
    $_SESSION['page_stack'] = comparePageStacks($_SESSION['page_stack'], $page_stack);  
} // ifto  
if (isset($_SESSION['page_stack'])) {  
    if (basename($PHP_SELF) == 'help.php') {  
        // continue  
    } else {  
        // remove any redundant entries in $_SESSION['page_stack']  
        $_SESSION['page_stack'] = comparePageStacks($_SESSION['page_stack'],  
$page_stack);  
    } // if  
} // if
```
