You are not using the new verson of dict_table.class.inc that I sent you. In it I replaced

count(dict_column.table_id) as column_count

with

(SELECT COUNT(table_id) FROM dict_column WHERE dict_column.database_id=dict_table.database_id AND dict_column.table_id=dict_table.table_id GROUP BY dict_table.table_id) AS column_count

This new code does not produce the error that you are having.
