Hi All

when i try to login to radicore for the first time i get the following error:

This application has encountered an unrecoverable error
The following has been reported to the administrator:

2009-11-23 11:47:19
"Fatal Error: MySQL: Unknown database 'audit' (# 1049).

Error in line 54 of file 'C:\marketing\radicore\includes\dml.mysqli.class.inc'.

Host Info: localhost via TCP/IP
Server Version: 5.0.45-community-nt-log
Client Version: 5.0.37, Character sets - client: utf8, - connection: utf8, - database: utf8, - server: utf8

PHP_SELF: /radicore/menu/logon.php

SERVER_ADDR: 127.0.0.1

SERVER_NAME: localhost

HTTP_HOST: localhost

REMOTE_ADDR: 127.0.0.1

REQUEST_URI: /radicore/menu/logon.php?csxslt=off"

I placed the radicore files in the following directory
"C:/marketing"
Apache 2.2 knows this to be the localhost directory.
The mySQL data base that i have been using is the "test" database

I am new to this type of environment. Where did i go wrong?
I have followed the installation instructions but i feel that i may have made mistake somewhere.

Thanks in advance
Azalea the Newbie
