Hi All

when i try to login to radicore for the first time i get the following error:

This application has encountered an unrecoverable error

The following has been reported to the administrator:

2009-11-23 11:47:19

"Fatal Error: MySQL: Unknown database 'audit' (# 1049).

Error in line 54 of file 'C:\marketing\radicore\includes\dml.mysql.class.inc'.

Host Info: localhost via TCP/IP

Server Version: 5.0.45-community-nt-log

Client Version: 5.0.37, Character sets - client: utf8, - connection: utf8, - database: utf8, - server: utf8

PHP\_SELF: /radicore/menu/logon.php

SERVER\_ADDR: 127.0.0.1

SERVER\_NAME: localhost

HTTP\_HOST: localhost

REMOTE\_ADDR: 127.0.0.1

REQUEST\_URI: /radicore/menu/logon.php?csxslt=off"

I placed the radicore files in the following directory

"C:/marketing"

Apache 2.2 knows this to be the localhost directory.

The mySQL data base that i have been using is the "test" database

I am new to this type of environment. Where did i go wrong?

I have followed the installation instructions but i feel that i may have made mistake somewhere.

Thanks in advance

Azalea the Newbie
