Hello:

This issue only occurs when I click on Home / Menu System / Subsystem

The result is:Quote:Forbidden
You don't have permission to access /radicore/menu/menu.php on this server.

This simply isn't true. Menu.php was already accessed to get here, plus all menu/mnu_....php files have "644" permissions.

All other tabs in the Menu System work fine.

Sequence isn't important - clicking the Subsystem tab after clicking ANY other Menu System tab yields the same result.

What can I do to fix this?

Thanks.
