I'm uploading an ms-excel file with this `_cm_uploadFile` function

```
function _cm_fileUpload ($input_name, $temp_file, $wherearray)
{
    $file_name = $input_name;
    $this->_processFile($temp_file);

    return $file_name;
}
```

The `processFile` function loads the `excel.php` file (attached), during the process the screen remain with `uploadFile` screen, finishing the process the screen turns white.
Any idea why it happens??
Thanks for advance.
