Hi,

I was using Radicore in Windows XP and everything was ok.

Thus, I decided to install it on an Ubuntu server:

ubuntu: 10.04

mysql: 5.1.41-3ubuntu12.6 (Ubuntu)

PHP Version 5.3.2-1ubuntu4.7

apache2

I have 2 problems:

- 1. although I changed .htaccess as described in the installation, the PHP would not include the Radicore path. Thus, I had to extend the include path in php.ini and seems to work. I attach the .htaccess file, maybe I do something wrong...
- 2. after "solving" step 1, I still get an error from the framework (Fatal Error: mysqli_connect(): Cannot connect to database '%1\$s'..). Is in the second part of the attached file.

Thanks!
Dan Stanescu
