Subject: Using Pipe3 to model workflow

I was very interested in how workflow is implemented in Radicore and read a bit about Petrinets etc. I downloaded the Pipe3 program to model my workflow. I can create the nets OK and save them, but I cannot open them up again - I get a java error.

I know its outside the scope of Radicore, I was just wondering if anyone else had experienced this and had solved this problem?

Thanks and regards

Graham Jones
