After monitoring the php_session table using triggers I found the following:

The session data at 2012-10-05 11:23:17 was
full with information (attachment).

One second later at 2012-10-05 15:23:18 it was deleted by a DELETE query.

Two second later it was filled with:
message
messages|s:38:"You must log in to access this system.";

Thanks,
