---

Tony, some more:

In the page

<http://www.radicore.org/glossary.php>

the link to <http://www.oracle.com> (Line 384) (with one t)

should be changed to

<http://www.oracle.com>

Also in

<http://www.radicore.org/glossary.php>

the following anchors are duplicated:

rls - lines 966 and 974

rbac - lines 931 and 970

vpd - lines 1136 and 1151

Also, in page <http://www.tonymarston.net/php-mysql/radicore-front-end.html>

line 96

<p>Files in one application can be accessed by the other by means of modifications to the <a href="http://uk2.php.net/manual/sl/ini.sect.path-directory.php">include\_path</a> in htaccess files.

The front-end should use an include\_path which specifies directories in the following order:</p>

the link to <http://uk2.php.net/manual/sl/ini.sect.path-directory.php>

is not working.

Thanks.
