Tony,

I checked the emerald.css, emerald-narrow.css and emerald-wide.css files with The W3C CSS Validation Service

(<http://jigsaw.w3.org/css-validator/>)

and it complains of the following error:

Sorry! We found the following errors (1)

URI : TextArea

17 input.submit, input.button Value Error : font-size Too many values or values are not recognized : 100% px

I think it wants either 100% or 100px.

Thanks.
