Tony,

In this sample page
http://www.tonymarston.net/sample/person_add.php
the file picker
[http://www.tonymarston.net/sample/x_person\(filepicker\)_x](http://www.tonymarston.net/sample/x_person(filepicker)_x)
is not working.

It simply displays a blank page.

Perhaps it is not a bug but a security restriction.

In that a case a message explaining the restriction would be helpful.

Thanks again.
