Tony,

The error handler generates invalid html pages.

- 1)  
They are missing the following tags:  
<!DOCTYPE html>  
<html>  
<head>  
<title>This is the title </title>  
</head>  
<body>  
<!-- here goes the content -->  
</body>  
</html>
  
- 2)  
Element <h2> cannot be a child of element <font>, nor of element <b>.  
Element <p> cannot be a child of element <font>, nor of element <b>.
  
- 3)  
The REQUEST\_URI contains a hyperlink with an unencoded ampersand. It should be changed to &amp;

-----  
Example of the html code generated by the error handler:

```
<h2>This application has encountered an unrecoverable error</h2>
<p>The following has been reported to the administrator:</p>

<b><font color='red'>
<h2>2006-09-25 05:06:17</h2>
<p>Fatal Error: mysqli_connect(): Cannot connect to database 'audit'..</p>
<p>Error in line 232 of file 'C:\xampp\htdocs\radicore\includes\dml.mysql.class.inc'.</p >
<p>PHP_SELF: /radicore/dict/database(list1).php</p>
<p>CURRENT DIRECTORY: C:\xampp\htdocs\radicore\dict</p>
<p>SERVER_ADDR: 127.0.0.1</p>
<p>SERVER_NAME: localhost</p>
<p>HTTP_HOST: localhost</p>
<p>REMOTE_ADDR: 127.0.0.1</p>
<p>REQUEST_URI: /radicore/dict/database(list1).php?selection=dict_table(list
1)&session_name=menu0 </p>
```

</font></b>

-----

Thanks.
