Tony,

It would be nice if Radicore had a Date Picker analogous to the File Picker (http://www.tonymarston.net/php-mysql/dialog-types.html#filep icker)
it already has.

The date picker could be invoked from a parent function with a popup button next to a date entry field.

It could be like a List1 screen but with multiple columns.

Perhaps you could reuse some code of
http://www.tonymarston.net/php-mysql/showsource.php?file=cal endar.php
