Tony, I was thinking of assigning possibly more than one role, each one with mutually exclusive tasks (not with duplicated tasks).

For example, having these roles:

- \*read\_and\_search
- \*create and modify
- \*delete

Or these roles:

- \*good and services
- \*stock control
- \*sales
- \*shipping
- \*human resources

I think the problem of multiple starting tasks can be solved having a hierarchy of roles.

Thanks.
