Is there a file missing in the because now i get a undefined reference for function

```
include.xml.php4.inc:1116:    $id = removeTableSuffix($id);  
include.xml.php5.inc:1114:    $id = removeTableSuffix($id);
```

Greetings.

Btw. I got the error because the enum field in my case is hidden, and i was setting it in the `_cm_pre_insertRecord` function to the first value from `fieldspec['enumfield']['values']` array.

Greetings

Johan
