Thanks for the guidance. I have also noted since I posted that <http://www.tonymarston.net/php-mysql/dialog-types.html#popup> details that choose null and cancel are not the same, and shows a screen from the framework with a choose null option - /dict/table(popup2).php, from relationship(add2)a.php, which I did not find previously as I was only looking at ones from add3 screens.
