Hi Tonyï¼š

We use Radicore on such situation: A batch run on radicore listenning for something happen , when it happened ,the workflow start.

The problem is, when the workflow start, we can't find a way radicore can redirect to another pages(which is the 2nd task in the workflow) from batch,thus the workflow can not be processed.

Can you tell me how to redirect from batch also carrying the session along?

Thanks!
