I try radicore version 1.18. I upgrade to 1.19 and the problem is OK.

But, when I try import table:
 x_person
..
..
value2 numeric(10,2)
..
..

The system show the next message:
..
..
Seq: 11, col_minvalue: Value is not a number
Seq: 11, col_maxvalue: Value is not a number
Seq: 11, user_maxvalue: Value is not a number
..
..

I revised the xample aplication, and the column is defined : DECIMAL, but in the xample-schema.sql, say numeric(10,2).

PD: Thanks for all
