I unzipped that file and installed it into my test environment, but I am unable to run anything due to missing files. There are two items in the 'HTM' menu, but neither of them work. When I click on the tabs all I see are the following error messages:

File name 'htm_db_kontakte_typ(list1).php' does not exist
File name 'htm_db_tree_type(list1).php' does not exist

Please send me the missing files.

I will also need your database schema with some test data.
