Here are just a few examples:

Example 1

```
$where = "test_id < 3 ";(With tabs between 'test_id' and '<' )
```

Example 2

```
$where = "test_id <  
3 ";
```

Example 3

```
$where = " test_id < 3";(With tabs before 'test_id')
```

Example 4

```
$where = "  
test_id < 3";
```

Example 5

```
$where = "test_id < 3";
```

Examples 1 and 2 both result in

```
Fatal Error: Cannot extract token from: '< 3' (# 256)  
Error in line 6994 of file 'D:\Pet\UwAmp\www\rad186\includes\include.library.inc'.
```

Example 3 and 4 both result in

```
Fatal Error: Cannot extract token from: ' test_id < 3' (# 256)  
Error in line 6994 of file 'D:\Pet\UwAmp\www\rad186\includes\include.library.inc'.
```

Example 5 functions normally without errors.
