I still struggle with the generation of the tree structure. I read the tutorial several times and also looked in the Xample application.

I now have the problem that I don't see the + and - signs for expanding and collapsing my structure.

I have a primary key with three coloumns and changed the code the specified class files but with no success.

I have three levels. Under each level I inserted a node. Isn't it that level two should be expandable/collapsable in the tree structure? If not, which section of the tutorial should I read once again?
