You have two errors here:

(1) MySQL: Unknown column 'tarifa.printbutton' in 'where clause' is caused by the fact that you have "AND tarifa.printbutton IS NULL" in your WHERE clause. A column called 'printbutton' does not exist in the database.

(2) error_log() [function.error-log]: Failed to connect to mailserver at "localhost" port 25, verify your "SMTP" and "smtp_port" setting in php.ini is caused by the fact that the error_log() is trying to use the mail() command, but you have not set up the corresonding values in your PHP.INI file.
