Subject: Re: BUTTON IN THE DATA AREA Posted by AJM on Wed, 04 Nov 2015 10:52:15 GMT View Forum Message <> Reply to Message

The problem is that the line "\$fieldarray['printbutton'] = null;" is being executed too soon, and it is causing the \$where string to be regenerated to include 'printbutton'. To avoid this you need to use the following code inside _cm_changeConfig():

if (empty(\$where) AND !empty(\$fieldarray)) {
 \$fieldarray['printbutton'] = null;
}
