Subject: Del1 - no table name in query

I changed tablenames in my database and now I have a problem with a few tables when I want to delete a record. The following error message comes up:

Fatal Error: MySQL: You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'WHERE user_id='HTM' AND user_seq_no='34' AND rdcaccount_id='4' LIMIT 1' at line 1 (# 1064)

SQL query: SELECT SQL_CALC_FOUND_ROWS * FROM WHERE user_id='HTM' AND user_seq_no='34' AND rdcaccount_id='4' LIMIT 1

I can insert, read and update records in these tables but not delete them. I checked the tasks in the Menu system and if there is the correct tablename in the htm_orga_kontakte(del1).php file. I exported the tables to php once more. I also stepped through the code with the debugger but in the end I didn't recognize where my fault is.

What else can I do to solve this problem? Is there another place/table where I have to change the tablenames? I wonder why I can delete records in some tables and in some tables not.
