The error messages "Error while sending STATISTICS packet" are produced by the Joomla framework and have nothing to do with Radicore.

You need to find out what is happening when `std.table.class.inc` passes control to `dml.mysql.class.inc`. This happens in the `_dml_deleteRecord()` method which contains the following line of code:

```
$DML->deleteRecord($this->dbname_server, $this->tablename, $fieldarray);
```

It is the contents of `$this->tablename` which is put into the FROM clause of the delete statement, and this should NEVER be blank.
