Did you something change with the multi-line text box? In the detail view I only see one line. In the dictionary configuration I set it to 3 lines, 1 row.

Here the dict.inc entry:

```
$fieldspec['text']= array('type' => 'string',  
    'size' => 65535,  
    'required' => 'y',  
    'control' => 'multiline',  
    'cols' => 1,  
    'rows' => 3);
```
