---

This is a minor bugfix release which contains the following:

Database changes:

- None

Other changes:

fixed problem in filepicker screens by renaming 'file', 'size' and 'date' fields to 'file\_name', 'file\_size' and 'file\_date'. This to to resolve confusion between 'size' being used as an attribute as well as a name.fixed bug in a batch process started from a navigation button which caused it to lose the current selection criteria.fixed bug in "List Database" screen which caused it not to show the subsystem name.
