Subject: Re: Subject: Fatal error: File C:\wamp\www\radicore\menu\text/en/sys.language\_text.inc is empty in C:\ra Posted by carlosgmpy on Mon, 25 Sep 2017 13:19:39 GMT View Forum Message <> Reply to Message

Hi,

I been looking that you suggested, but everything was ok. All the files in place. I changed my computer lenguaje to english, and now I think where is the error, looking back to the program calls.

-----

(!) SCREAM: Error suppression ignored for

(!) Fatal error: File C:\wamp\www\radicore\menu\text/en/sys.language\_text.inc is empty in C:\wamp\www\radicore\includes\include.library.inc on line 3651

Call Stack

# Time Memory Function

Location

1 0.0108 297272 {main}( )	\logon.php:0
2 1.9224 7200504 radicore_view->	_construct()\logon.php:212
3 1.9258 7318944 trigger_error ()	\include.xml.php5.inc:37
4 1.9258 7319776 errorHandler()	\include.xml.php5.inc:37
5 1.9258 7326560 getLanguageText	()\error.inc:166
6 1.9267 7247992 trigger_error ( )	\include.library.inc:3651

Found that probably the problem is with XSL functions. In the include.xml.php5.inc --> trigger\_error(getLanguageText('sys0070', 'XSL'), E\_USER\_ERROR);

Looking at installation instructions, in point

4. You will need to change permissions so that the following directories have write access:

RADICORE - for the errorlog.html file.

CLASSES - for all .class.inc and .dict.inc files.

ERROR\_LOGS - for errorlog.html file.

LOGS - for all output from background tasks.

SQL - for all <subsystem>.dict\_export.sql and <subsystem>.menu\_export.sql files.

TEXT - for all <subsystem>.menu\_export.txt files.

XSL - for all <script\_id>.xml files.

Probably that is my problem!

But in my actual windows 10 enviroment and don't know how to do this. Do I have to change in the httpd.conf?

Thank you for your support!
