Just did a reinstall of my environment and found a few minor issues.

1. Load of mnu_user_role radicore/menu/sql/mysql/mnu-user.sql
a) Data in the file references column is_primary. However the column has been dropped by alter_table(2017-07-20).sql. Data mnu-user.sql therefore does not load
==> I removed the values from the sql data file for the column assuming it should not be loaded
b) Data does not contain values for column sort_seq, which has been defined as not allowing null values. Data mnu-user.sql therefore does not load
==> I added the column to the sql data file and set the values according to the change in alter_table(2017-07-20).sql:
UPDATE `mnu_user_role` SET `sort_seq`=1 WHERE `is_primary`='Y';
UPDATE `mnu_user_role` SET `sort_seq`=9 WHERE `is_primary`='N';

Are my assumptions correct? Would it be possible to change mnu-user.sql accordingly?

2. I could not logon to the system, had the same problem as previously reported:

This application has encountered an unrecoverable error
The following has been reported to the administrator:
2017-10-09 17:49:04
Fatal Error: File /var/www/html/radicore/menu/text/en/sys.language_array.inc is empty (# 256)
Error in line 3395 of file '/var/www/html/radicore/includes/include.library.inc'.
...

I think the problem is in this code:

```
        $file_language = basename(dirname($fname));
        if (!array_key_exists($language, $system_msgs)) {
===>          $system_msgs[$file_language] = require_once $fname;  // import contents of disk
file
===>           if (empty($array)) {
             //trigger_error(getLanguageText('sys0124', $fname), E_USER_ERROR);
             trigger_error("File $fname is empty", E_USER_ERROR);
           } // if
           unset($array);
```

The contents of the file is loaded into $system_msgs[$file_language], however the variable $array is used for evaluation. $array has not been initialized (though is empty) in the code and therefore the condition evaluates to true, resulting in the error mentioned above.

As a temporary fix I commented the if statement.

This sequence of statements do occur multiple times in include.library.inc.

Cheers, Divico
